INTERFERENCE SEARCHED			
Class	Subclass	Date	Examiner

The diagram consists of two horizontal black lines. The top line is positioned higher than the bottom line. Two vertical black lines intersect these horizontal lines. One vertical line intersects the top horizontal line at its left end and the bottom horizontal line at its right end. The other vertical line intersects the top horizontal line at its right end and the bottom horizontal line at its left end. This creates a central intersection point where all four lines meet.
